# Luis Ponce

Software Developer

## WORK EXPERIENCE

### 2021 - Present
Acklen Avenue | Nashville
#### Full-stack Developer

- Worked on a HIPAA compliant mental health app for psychotherapists using React, Typescript, NestJS, Auth0, AWS and PostgreSQL.
- Participated in a payment platform that distributes payments using smart contracts. Utilized Angular V13 and Azure AD B2C for authentication with custom policies.
- Built a search verification engine that finds treatment records of pet animals using React with NextJS, Typescript, NestJS, Auth0, AWS and PostgreSQL.
- Collaborated with product management and design teams that lead the completion of user-friendly MVPs which resulted in longer engagements with clients.

### 2021 - Oct 2021
Hero Unit | Nashville
#### Full-stack Developer

- Implemented a data analytics tool for tracking employees' progress on Badgr that helped HR support employees' career paths. Used React, NodeJs (NestJS), Typescript, and Firebase for Authentication and data storage.
- Developed a content delivery system that helps HR share sensitive information to all Hero Unit's employees using React, Typescript, and Strapi which resulted in better communication and on-boarding to new employees for the company.
- Contributed to a time tracking HR management tool by implementing new features and addressing technical debt. Additionally, I developed a Zap in Zapier to automate the logging of hours, which streamlined the HR process and improved overall efficiency. Utilized React, NodeJs (NestJS), Typescript, and PostgreSQL.

### 2019 - 2020
Transportec | San Pedro Sula
#### Full-stack Developer

- Integrated GCP Google Maps for route mapping and Hasura GraphQL to handle basic user data.
- Imlemented UI designs using React, HTML5 and CSS3.
- Ensured secure access to the app through authentication and authorization via Auth0.
- Developed a user-friendly calendar system that enabled easy scheduling of rides.
- Managed and deployed both the frontend app to AWS and the backend app to Azure.
- Awarded 3rd place in a national technological event in Honduras.

## EDUCATION

Universidad Tecnologica de Honduras (UNITEC), Software Engineer bachelor's degree

2017 - 2021

Universidad Jesus de Nazareth, Multi-platform development course

2016 - 2017

## ABOUT ME

Hello! I'm a full-stack developer experienced in frontend (React, NextJS, Angular) and backend systems (NodeJS, NestJS C# .Net Core, Azure, AWS). I have experience working with Scrum and Agile methodologies to manage software development projects. Whether working independently or collaboratively, I am passionate about learning new things and delivering high-quality code that exceeds expectations and drives business success.
